*denotes newly reported results; includes new and/or longer intersections for previously released partial assays.

Drill intercepts reported as core lengths; true widths estimated to be approximately 50% to 95% of reported widths.

Gray highlight and bold = GMV >\$150/t (based on metal prices of \$1.4 Zn, \$1.1 Pb, \$3.15 Cu, \$17 Ag, \$1275 Au)

Blue cells = Zn+Pb >5%, magenta cells = Ag > 50 gpt OR Au >0.5 gpt;
