## NEWS RELEASE

### **Constantine Receives US \$250,000 Option Payment from Dowa**

---

Vancouver, BC – Constantine Metal Resources Ltd. (TSX Venture – CEM) ("Constantine" or the "Company") is pleased to announce that it has received a US \$250,000 option payment from Dowa Metals & Mining Co., Ltd. ("Dowa"). This fourth payment brings the total payments received from Dowa to date to US \$1,250,000.

Dowa has just completed the third year of an option and joint venture agreement in which it can earn 49% in the Company's flagship Palmer Project in Alaska by making aggregate expenditures of US \$22 million. To the end of 2015, Dowa has spent approximately US \$16 million on the project. Constantine is currently working with Dowa to finalize plans and program scope for 2016.

#### **About the Palmer Project**

Palmer is a resource expansion stage, high-grade volcanogenic massive sulphide (VMS) project, with an Inferred Mineral Resource of 8.1 million tonnes grading 1.41% copper, 5.25% zinc, 0.32 g/t gold and 31.7 g/t silver\*. The Project is being advanced in partnership with Dowa, who can earn 49% in the project by making aggregate expenditures of US \$22 million over four years. The project is located in a very accessible part of coastal Southeast Alaska, with road access to the edge of the property and within 60 kilometers of the year-round deep sea port of Haines. Mineralization at Palmer occurs within the same belt of rocks that is host to the Greens Creek mine, one of the world's richest VMS deposits. There are at least 25 separate base metal and/or barite occurrences and prospects on the Palmer property, indicating the potential for discovery of multiple deposits.

\* See the Company's news release date May 11, 2015 and available on [www.sedar.com](http://www.sedar.com). Resource estimate utilizes an NSR cut-off of US\$75/t with assumed metal prices of US\$1200/oz for gold, US\$18/oz for silver, US\$2.75/lb for copper, and US\$1.00/lb for zinc. Estimated metal recoveries are 89.6% for copper, 84.9% for zinc, 75% for gold (61.5% to the Cu concentrate and 13.5% to the Zn concentrate) and 89.7% for silver (73.7% to the Cu concentrate and 16% to the Zn concentrate) as determined from metallurgical locked cycle flotation tests. An "Inferred Mineral Resource is that part of a Mineral Resource for which quantity and grade or quality can be estimated on the basis of geological evidence and limited sampling and reasonably assumed, but not verified, geological and grade continuity. Confidence in the estimate is insufficient to allow the meaningful application of technical and economic parameters or to enable an evaluation of economic viability worthy of public disclosure.

## About the Company

Constantine is a mineral exploration company led by a proven technical team with a focus on premier North American mining environments. The company's principal asset is the Palmer copper-zinc-silver-gold Project located in Southeast Alaska that is being advanced in partnership with Dowa. Constantine also controls a pipeline of quality gold projects in the Timmins camp Ontario and Yukon. Management is committed to responsible mineral exploration and to working with local communities. Please visit the Company's website ([www.constantinemetals.com](http://www.constantinemetals.com)) for more detailed company and project information.
